

THE PLEDGE

As the leader of Papa John's International, Inc., I now realize our vocal and financial support of the Black Lives Matter Global Network Foundation and its affiliates was short-sighted and did not fully contemplate the ramifications of their words and actions. Those words and actions included the defunding, demeaning, and violence against the women and men who serve our communities as police officers and put their lives on the line across this country every day.

Going forward, I pledge that on behalf of myself and the men and women who make up Papa John's International, Inc., we will strive to vocally and financially support our women and men "in blue" as well as the millions of first-responders and military personnel, and their families, that protect us every day from harm.
